*“Every great structure begins with one powerful truth: what’s beneath it must be stronger than what’s built on top. At Ruby Sand, we don’t just supply materials—we lay the groundwork for dreams to rise”
Built for Builders, Backed by Science, Inspired by Sustainability.*

Why choose our products?

Engineered
Economical
Eco-friendly

365 days Continuous
Supply

Superior Strength
ISI-383 Compliant

Uniform Size
Consistent Texture
Durable

RubySand and Aggregates Private Limited

WE SERVE ::

Residential - Commercial - Railways - Road Constructions - Government projects - RMCs - Precast Units

AGGREGATES PORTFOLIO

From strong foundations to flawless finishes – Choose the right aggregate for every layer of your construction journey.

Product	Where to Use	Why Choose It
6MM RUBY AGGREGATES	Precast blocks, brick joints, designer concrete floors	Fills micro-voids for smooth, strong, and precise finishes
10MM RUBY AGGREGATES	RCC floors, pavements, medium foundations	Perfect balance of strength and workability for better compaction
12MM RUBY AGGREGATES	RCC columns, beams, retaining walls, drainage works	Uniform gradation for strong bonding, reduced cracks, and better flow
20MM RUBY AGGREGATES	Bridges, flyovers, structural RCC, heavy-duty floors	High compressive strength and long-term durability
40MM RUBY AGGREGATES	Used for drainage layers, and road base, Highways, heavy machinery foundations	Superior interlocking and drainage for stable base layers
60MM RUBY AGGREGATES	Embankments, erosion control, deep foundations	Excellent load distribution and long-term stability
RUBY GSB (Granular Sub Base)	Under highways, roads, and industrial yards	Spreads load evenly to extend pavement life and stability
RUBY WMM (Wet Mix Macadam)	Final road layer before asphalt	Improves road compaction, water resistance, and fatigue strength
RUBY BRICK MASONRY	Brick laying, boundary walls, partitions	Smooth, consistent mortar for strong bonding and fast plastering
RUBY ULTRA PLASTER	Interior and exterior walls, ceilings	Ready-to-use, crack-resistant, and smooth finish with high coverage
RUBY CONCRETE SAND	All concrete works, RMC plants, precast products	Engineered sand for stronger, cleaner, and more durable concrete
RUBY RAILWAY BALLAST	Used for track stability, load distribution, and drainage in railway projects.	High-strength aggregates with excellent drainage and durability

A Legacy of 20+ Years Built on Trust, Quality & Performance

- Advanced production plant
- 100% dust-free
- 24/7 supply chain & logistics support with 95% on-time delivery
- 1,000+ satisfied clients from small builders to mega-project developers
- 100+ quality tests conducted monthly to ensure uncompromising standard

We believe in building not just structures, but relationships that last. With consistent product quality, ethical business practices, and a customer-first mindset, Ruby Sand is your dependable partner in building the landmarks of tomorrow.
